1 Introduction

Odin Wallet is a non-custodial wallet built on the Solana blockchain, inspired by Norse mythology. It blends ease of use with powerful features through an immersive user experience and strong visual branding.

ODIX Token (\$ODIX) is the utility token of the ecosystem, designed to unlock premium features, reward participation, and empower the Odin Wallet community.

2 Vision and Mission

Vision: Become the leading decentralized wallet in Latin America with a unique and culturally resonant identity.

Mission: Empower users through Web3 tools that are secure, intuitive, and inspired by Norse legend.

3 Problems We Solve

- Complex and unfriendly UX in existing wallets.
- Fragmented functionality across different apps.
- Weak branding and lack of community identity in crypto.
- Limited inclusion and onboarding of LATAM users.

4 Our Solution: Odin Wallet

The MVP includes:

- Sending and receiving SOL and SPL tokens.
- Integrated token swaps.
- Avatar-based profile customization.
- Token explorer with charts and stats.
- Multi-account support.
- Public launch of the \$ODIX token presale.
